ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. In mid-May 1951, tankers loading at Constanta used both the north and south sides of the quay separating the petroleum basin from the new petroleum basin.
2. On the quay were 12 pipelines each about 20 centimeters in diameter . About 450 tons of "Avtol" lubricating oil was loaded in slightly over three hours.
3. The pipelines led to the storage area, where 15 large tanks (no details) were located. Each tank was protected by a concrete construction which formed an incline from the top of the tank to the ground.
